**PRICES
SLASHED**

Our Large Digital prints are made using our Canon ipf PRO4000 12 ink archival printer with Permajet or Fotospeed paper stock. For normal digital prints we offer Fotospeed Lustre 275g, Fotospeed Gloss 270g & Fotospeed Matt Ultra 240g.

For that 'something special' look, we also have Permajet Titanium Lustre 280g & Fotospeed Metallic Gloss 275g papers which have the look of a metallic base colour.

Should you require poster prints that are only going to be used for short term display we the lighter weight Novajet Pro Satin 200g.

Each price is for the specified size of paper. If you require a border on your prints(up to a maximum of 2" per side), an extra charge of 10% of print cost will be made.
