Scan to CD (High Resolution) - Excluding developing cost.	5.00	5.00	2.50

Film is not dead, contrary to what many processing labs will have you believe. It quite obviously isn't as popular as it used to be, but we are still able to provide a service for those of you still using perfectly good film cameras.

Apart from the traditional services such as Developing & Printing, Reprints and Enlargements we can scan your films and produce a CD of the images. This then gives you an easy entry into the "digital age".

If you find some undeveloped films at home, and have no idea what is on them, we have a solution to help you. We offer a FILM AMNESTY whereby we will develop the film and create a 7"x5" index print so that you can see what masterpieces you have. This is a great idea as it means you do not have the cost of having a set of prints done only to find out they are all rubbish.

We are able to process & print 35mm Colour or Black & White C-41 films. Obviously with colour films we can give you colour prints, but should you wish to have that retro look, we also offer black & white prints from colour film.

Unfortunately we are not able to process conventional Black & White films such as Ilford FP4, HP5 or Kodak TRI-X, but we can produce prints from these films if you have already had them processed.

SERVICE TIMES

STANDARD - 2 working Days

EXPRESS (Mon, Wed & Fri) - 1 Hour

BULK DISCOUNT

10+ Films - 10% discount
