Our in-store kiosks allow you to order prints of various sizes from a wide range of storage media such as SD cards, Compact Flash cards, CD/DVD and USB. In addition to these, you are also able to have prints done from your mobile phone (Android, iPhone or Windows) or tablet (Android or iPad). Please be aware that if uploading from your mobile device, the images must be on the device. We are not able to access any cloud storage you may use.

Images can be edited for cropping etc once uploaded to the kiosk so that you are able to improve the final result if necessary.

Our enhancement software will automatically assess your images and will make adjustments so that brightness, contrast and saturation levels are optimised. If you are a photographer who edits images at home, it is highly likely that you will not need any further corrections applied. Should your images be of this nature and you do not want us to make any corrections you must state it at the time of ordering.

Glossy or Lustre papers are available. Do you like white borders on prints? If so we can apply them at no extra cost so please ask at time of ordering.

SERVICE TIMES

Service times are dictated by the quantity and size of prints in your order. For just a few 6"x4" prints you could collect within 5 minutes. We will advise of timescale when you order.

PRICES EFFECTIVE FROM 4TH JUNE 2018
